

Power BI Licensing Overview

Types of Power BI Licensing

1. Power BI Free: Best for personal use, allows creating reports in Power BI Desktop.
2. Power BI Pro: Includes sharing, collaboration, and publishing to Power BI Service.
3. Power BI Premium Per User (PPU): Enhanced features like AI, paginated reports, and larger datasets.
4. Power BI Premium Capacity: Dedicated cloud capacity for enterprise-scale deployments.
5. Power BI Embedded: Designed for developers to embed dashboards into apps.

Difference between All Types of Licensing

- Power BI Free allows personal report building but no sharing.
- Power BI Pro is needed for collaboration, sharing, and using workspaces.
- Premium Per User offers advanced features at user level.
- Premium Capacity provides enterprise-wide features and capacity.
- Embedded is tailored for app developers, not individual users.

Benefits of Power BI Premium over Power BI Pro

- Higher data capacity (100 TB vs 10 GB/user).
- Paginated reports and AI capabilities.
- On-premises reporting with Power BI Report Server.
- Better performance with dedicated cloud resources.
- No need for every user to have a Pro license (in Premium Capacity).
